Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 14, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Marmorstein et al (US 5,337,825).

Marmorstein et al discloses a system and method of increasing oil well productivity, which comprises all of the claimed structure including mechanical unloading or cutting means by cutting slots near well zone (col. 5, lines 44-53). The means for cyclically treating well is anticipated by col. 2, lines 2, lines 27+, where cyclic treatment of the near well zone with seam treating liquid is anticipated. The operational or functional limitations such as "with controlling a density of a formation and correcting the cyclical treatment in correspondence with the density of the formation" fails to constitute a patentable distinction as being failing to further show their respective supportive structural elements necessary to carry out such operation or functions as claimed and hence consider to be anticipated by Marmorstein et al. The surface and underground equipments recited in claim 14 are anticipated by the pump means used on the surface and the jet means used underground as being shown in fig. 3, and col. 3, lines 45-57.

Allowable Subject Matter

Claims 2, 7-13, 15-17, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McLaughlin et al and Curevich et al all show well treating apparatus and methods.
